

Application for Preregistration of a Holsteiner Foal

(Preregistration or Foal Recording)

Registration in the HHANZ Stud Book requires both preregistration and successful Classification.

ALL HOLSTEINER FOALS – Colts, Fillies and Geldings not previously registered.

Preregistration is usually performed before weaning and should be carried out before Classification. (Yearlings and 2yo horses not previously registered may use this form).

It is performed by a Veterinarian who identifies the horse, if necessary views the service certificate, DNA samples the foal and permanently marks the foal by unique branding or microchipping (or both). He completes the DNA form (as or thoroughbreds) in quadruplicate and dispatches the DNA sample to Massey (with the yellow copy of form – please mark on sample envelope that payment is through Holsteiner Society, owner and horse’s name and sex). Owner completes this form below and it goes with the white copy of the DNA form plus the fee’s form and payment to the HHANZ Registrar. The fee (at present \$150) covers HHANZ registration and covers the DNA testing at Massey. (Classification is a separate form and fee). The foal owner keeps the blue copy of the DNA form with the foal’s records. (Recommendation: keep colour photos of the foal showing markings with your records).

The foal’s Sire should be in the HHANZ Stud Book, have a current Breeding permit and have DNA results available at Massey.

The foal’s Dam should be in the HHANZ stud book as a Holsteiner Mare or a Foundation Mare or should be about to be presented for Classification (and pass that classification) and have DNA results available at Massey.

NAME OF OWNER _____ MEMBERSHIP NO. _____ DATE _____

NAME OF Foal _____ Filly/ Gelding/ Colt Number _____ (Office use)

Colour _____ Date of Birth _____ Service Certificate No. _____

Sire _____ Dam _____ (tick) In stud book ___ Pending ___
